# Spark growth over a drink

What is our brand value?

We connect youths with future-inspiring moments over the enjoyment of a good drink.

What is our mission?

At 2324, we are more than just a bubble tea shop. We are a supportive community for young individuals to come together for insightful chitchats. Our goal is to foster an environment that empowers youths to engage and influence the local subculture, creating future-inspiring moments that shape their personal and professional journeys.

What makes us special?

What sets 2324 apart is our dedication to connecting youths with future-inspiring moments. We go beyond serving delicious bubble tea by providing an offline hub where young individuals can gather, engage in insightful chitchats, and gain inspiration from community insights. Our focus on empowering and supporting young people sets us apart, allowing them to actively shape and influence the local subculture while enjoying their favorite bubble tea.

# Notes of Interest

- We calculate all our catering service quotations based on the quantity of drinks, specific ingredient requirements (such as tapioca, brown sugar syrup, or other add-ons), beverage type (tea, milk), sugar and ice content, and delivery distance.
- As the preparation of these elements necessitates more time and labor, customers seeking cost reduction should consider limiting the variety of drinks ordered or choosing predominantly from the Refreshing/ Yakult series.
